

Kined™
SYSTEMS INC.

EFFICIENT TECHNOLOGY INTEGRATORS

www.kinedsystems.com

ABOUT KINED SYSTEMS

Founded in 2004, Kined Systems is a New York-based company that has evolved into a dynamic industry leader—delivering innovative solutions, implementing technical efficiency, and bridging the gap between business and technology.

EFFICIENT SYSTEMS THAT CUT COSTS

In today's world, leading companies depend on complex computing systems for vital business functions. At Kined Systems, we leverage efficient industry-leading software and hardware to help companies optimize, automate and transform their business processes for greater efficiency, productivity and security.

We can help you:

- ⇒ Reduce IT costs
- ⇒ Increase ROI on technical investments
- ⇒ Increase operational efficiency
- ⇒ Focus on your business' success, without stress or worry over technical details

THE KINED METHOD

Kined Systems' unique approach applies stringent methodology to create a custom solution for every challenge. Our certified specialists will analyze and evaluate your present technology infrastructure and investments, then design a solution that maps to your business' specific requirements—and budget.

WHAT WE OFFER

PROFESSIONAL AND MANAGED IT SERVICES

We provide a full suite of professional and managed services that include:

DIRECTORY SERVICES

Kined Systems facilitates automatic account management using technology such as Microsoft Identity Lifecycle Manager, Forefront IDM, Quest ActiveRoles and Quick Connect to implement a one-stop solution. We have mastered integrations with all platforms: Unix, Linux, Windows Directory services, Novell Directory services, MS SQL, Oracle, Siebel, PeopleSoft, Access, Excel—even flat text files. Working in tight coordination with HR, we remove the guesswork from your Help Desk. We bring HR and IT together, tying Active Directory to your HR system.

ACTIVE DIRECTORY (AD) AND IDENTITY MANAGEMENT

We enable you to automate and consolidate identity administration, without compromising security.

REPORTS FOR MESSAGING SYSTEMS

We leverage Quest MessageStats for Exchange messaging reports. Quest MessageStats provides messaging reporting and analysis to assist IT managers, messaging administrators and business users.

STORAGE AND VIRTUALIZATION

Whether its VMware or Microsoft Hyper-V, Kined Systems will evaluate your environment and determine which virtualization platform provides the best ROI, without complicating your decision making. Our experts have deep understanding of storage solutions, from NetApp, HP, DELL, EMC, and Centerra.

SYSTEMS MANAGEMENT

Our system management offerings include 24 /7 monitoring, patch management, asset management, remote control, and end-user self services.

WEB INFRASTRUCTURE PORTALS

Using Cloud/SaaS (Software as a Service) management, Kined Systems provides virtual office technology that is intuitive and user-friendly, with no limit as to how large your business can grow. Our alliance with Microsoft and Rackspace enables our clients to have access to the newest versions of software, such as Exchange, Share-Point, LiveMeeting and instant messaging for a fraction of the usual cost.

WHAT WE OFFER

MESSAGING AND COLLABORATION

Without a doubt, efficient electronic communication is paramount to business success. We provide our clients with several options, including outright outsourcing of messaging to Kined Systems. Our goal is to let you take your business with you wherever you go, messaging with ease and security.

Our consultants are Microsoft Exchange certified, have Quest software product expertise, and are extremely experienced in:

- ⇒ Acquisitions, mergers or reorganization
- ⇒ Upgrades and migrations
- ⇒ Unified messaging, including mobile and instant messaging
- ⇒ Portal integrations
- ⇒ End-user training

IDENTITY MANAGEMENT

Access to company resources is vital for collaboration among employees, customers and business partners. However, in the wrong hands, such access can be extremely detrimental. Kined Systems will streamline identity management for ease of use—without compromising security. As the amount of resources and types of access your business demands increase, it's important more than ever to manage identity everywhere within your enterprise technologies.

Kined System's identity management solutions can:

Improve Efficiency

- ⇒ Automate identity administration
- ⇒ Consolidate directories and identities into AD
- ⇒ Achieve single sign-on and build on existing investments

Enhance Security

- ⇒ Extend the security of AD to non-Windows systems and applications
- ⇒ Enforce uniform security policies across the enterprise
- ⇒ Control and delegate elevated and least-privileged accounts
- ⇒ Establish strong authentication

Achieve Compliance

- ⇒ Prove compliance through audit, reporting, and alerting tools
- ⇒ Ensure AD compliance for non-Windows systems and applications
- ⇒ Assess identity and access management policies
- ⇒ Implement and enforce strong password policy and authentication

Automated management of identity reduces overhead costs associated with creating and managing user accounts in several resource vaults. Password self services removes the need for calls by end users for password reset. **IT support calls often drop by as much as 90%.**

WHAT WE OFFER

BUSINESS CONTINUITY SOLUTIONS

Is your business safe in the event of a disaster? Business Continuity (BC) processes provide a framework to ensure your business continues to serve key customers should you be threatened by virus attacks, malicious destruction of data and/or physical site destruction by hurricanes, fires, terrorist attacks or other disasters. In today's uncertain world, we believe every company should have a plan to continue business should adversity strike.

Our BC solutions will mitigate your risk with industry-leading plans and solutions, helping to protect not only your critical system availability, but also the reputation of your business.

Our BC solutions include:

- ⇒ Analyzing potential business impacts under various scenarios
- ⇒ Implementing change management
- ⇒ Reviewing Service Level Agreements (SLAs) with your vendors
- ⇒ Assessing the vulnerabilities of your business
- ⇒ Documenting procedures and standards
- ⇒ Defining business continuity strategy
- ⇒ Developing and implementing the plan
- ⇒ Preparing and training staff
- ⇒ Testing of data restore and DR simulation on a quarterly basis

COMPLIANCE

Today, many organizations must follow strict sets of regulatory requirements, such as GLBA, Sarbanes-Oxley, HIPAA, OMB Circular A-123 and FISMA. Kined Systems can assist you in meeting complex regulatory demands, thereby mitigating risk of litigation or penalty.

After careful evaluation of your legal obligations, we scale any one of the following technologies to address your needs:

- ⇒ Windows Rights Management Server
- ⇒ Quest InTrust
- ⇒ Quest ActiveRoles Server
- ⇒ Quest Archive Manager
- ⇒ Quest Change Auditor
- ⇒ Quest Recovery Manager for Active Directory and Exchange

CLOUD MANAGEMENT AND VIRTUAL OFFICE

Our signature online (Cloud) solution is offered through the Microsoft Business Productivity Online Suite (BPOS). Our solutions help reduce cost, increase user storage quotas, offer flexibility and provide more mobility with instant access from anywhere. We also design and implement hosted solutions while collaborating with Rackspace to provide users with reliable uptime, automatic backups, easy data recovery and compliance with federal regulations.
